

ROUTE 50 WIDENING PROJECT UPDATE

Construction on the Route 50 Widening Project has surpassed the halfway point and stands at just over 60% complete. The overall project is on schedule to be completed in November, 2015.

As the winter weather breaks and spring arrives, more construction activities will begin occurring throughout the project corridor, especially paving operations.

Crews continue to work on the westbound bridge over Cub Run. The beams have been set and preparations are underway to place the bridge deck. The bridge abutments have been formed and poured. Work on the culvert at Avion/Airline Parkway is expected to be complete this Spring.

Most of the current work taking place on the project involves utility relocations, such as water and gas lines and overhead power lines. This relocation work, which can be done during the winter months, is being done now to make way for the paving operations that will begin taking place with the warmer weather.

Please take note of the key milestone dates listed on this page, which include scheduled traffic shifts over the next few months.

APRIL 14, 2014

The project consists of the complete reconstruction of eastbound and westbound Route 50 between Poland Road and Route 28.

Milestone Dates

- > **April—Westbound traffic will shift to the right from Pleasant Valley (Loudoun) to Willard Road.**
- > **May—Westbound traffic will shift to the left from Lee Road to Stonecroft Boulevard.**
- > **June—Westbound traffic will shift to the right from Stonecroft Boulevard to Pleasant Valley (Fairfax) and onto the new westbound Cub Run bridge.**
- > **Early Fall 2014—Three (3) full lanes open eastbound through entire project**
- > **End of 2014—Three (3) full lanes open westbound from Stonecroft Boulevard to the end of the project at Poland Road.**
- > **November 2015—Project Completion Date**

Grading between Pleasant Valley Road and Willard Road in preparation for the new roadway

Placing concrete for the box culvert near Avion/Airline Parkway
