

Get Involved

Ten days after this public hearing, on October 18, 2013, the public comment period will close. VDOT will review and evaluate any information received as a result of this hearing. This information, including the hearing summary, will be available for review at the VDOT office address listed below. After all comments have been addressed, the information received as a result of the hearing will be presented to VDOT's Chief Engineer or designee for consideration. If approval of the major design features is received for this project, it will move forward to the final design phase. Public hearing participants will be notified of this decision by letter.

Comments can also be submitted in writing to Adam.Brooks@vdot.virginia.gov. Please reference "Route 460 turn lane improvement" in the subject line. Information must be postmarked, emailed or delivered to VDOT within 10 calendar days of today's meeting in order to be included in the design public hearing record.

Project information shared here is available for review after the public hearing at:

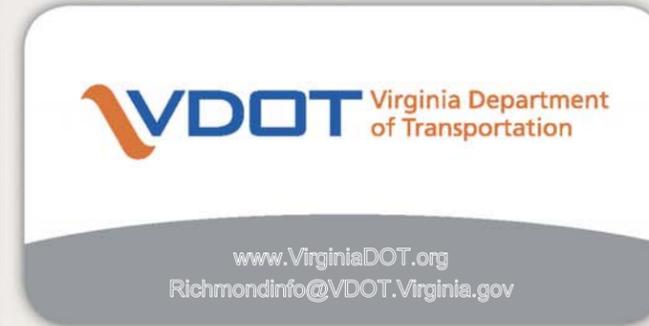

VDOT Richmond District
2430 Pine Forest Drive
Colonial Heights, VA 23834

Design Public Hearing Route 460 Turn Lane Improvement at Route 657 Prince George County

Tuesday, October 8, 2013, 5 - 7 p.m.
Disputanta Community Building
10010B County Drive, Disputanta VA 23842

Public Meeting

Welcome to the Virginia Department of Transportation's (VDOT) design public hearing on proposed plans to construct a left turn lane from Route 460 (County Drive) west to Route 657 (Enterprise Drive) in Prince George County.

This design public hearing is being held to provide an opportunity for any person, acting on his/her own behalf or representing a group or governing agency, to give the department comments and/or suggestions on the proposed project.

VDOT strives to ensure that all members of the community have the opportunity to participate in public decisions on transportation projects and programs affecting them.

VDOT representatives are present to discuss the project and answer your questions.

A comment sheet is included in the handouts for this meeting, and your input is encouraged. All oral and written comments received on this project will be included in a transcript for review by VDOT personnel, citizens and other interested parties.

Project Overview

Cost – Approximately \$1.26 million

Purpose – Add left turn lane from Route 460 west to Route 657

Location – Route 460 west between 0.1 miles west of Route 657 to 0.16 miles east of Route 657

Project Length – 0.27 miles

PROJECT DESCRIPTION

The primary purpose of this project is to increase safety by constructing a left turn lane from Route 460 (County Drive) west to Route 657 (Enterprise Drive) in Prince George County. The project will also include signs with flashing beacons to warn drivers in advance of the presence of an intersection. Minor right of way impacts to accommodate road widening are anticipated.

The design of this project is in compliance with the Stormwater Management Act, stormwater regulations and the annual stormwater management standards and specifications approved by the Virginia Department of Conservation and Recreation. The construction of this project will conform to the nationwide best management practices, VDOT specifications and special provisions, and the Virginia Department of Soil and Water Conservation regulations.

Also, during construction, every reasonable effort will be made to protect the environment with respect to dust and erosion control. Access to all properties will be maintained during construction.

Potential impacts to the flood plains will be evaluated and addressed on this project.

Route 460 facing west

Estimated Project Cost

Total estimated cost: **\$1.26 million**
 Engineering of roadway plans: **\$280,000**
 Right of way acquisition and utility relocation: **\$220,000**
 Construction: **\$755,000**

This project is in the early design stage; therefore, the costs above are subject to change. The project is being financed using a combination of federal and state funds.

Civil Rights

VDOT ensures nondiscrimination and equal employment in all programs and activities in accordance with Title VI and Title VII of the Civil Rights Act of 1964. If you need more information in regards to your civil rights on this project or special assistance for persons with disabilities or limited English proficiency, contact the project manager listed on the back of this brochure.

Right of Way

The construction of this project is not expected to require the displacement of any families, businesses or non-profit organizations.

As we further develop and finalize the construction plans for this project, additional easements for utility relocation may be required beyond the proposed right of way shown on the public hearing plans. The property owners will be informed of the exact location of the easements during the right of way acquisition process and prior to construction.

Information about right of way acquisition is discussed in VDOT's brochure entitled, "Right of Way and Utilities: A Guide for Property Owners and Tenants." Copies of this booklet are available from a VDOT right of way agent.

After this meeting, information regarding right of way may be obtained from the right of way contact listed on the back of this brochure.

Anticipated Schedule

The following schedule has been proposed:
 Design approval – November 2013
 Begin right of way acquisition – January 2014
 Advertise for construction – March 2015
 Completion – January 2016

Environmental Review

VDOT's Richmond District Environmental Office has performed environmental reviews and coordination to obtain information about environmental resources in the project vicinity; to provide natural and historic resource agencies an opportunity to review and comment on the project during its development; and to identify opportunities for avoidance, minimization and mitigation of potential environmental impacts.

The National Environmental Policy Act (NEPA) is applicable to this project and a Programmatic Categorical Exclusion has been developed in cooperation with the Federal Highway Administration and in accordance with federal guidelines. The NEPA document includes information from various technical reviews including those related to natural resources, water quality, threatened and endangered species, air quality, noise, etc.

The project will continue to be coordinated with the appropriate federal, state and local agencies as part of environmental review and approval processes required throughout project development and construction. All required environmental clearances and permits will be obtained prior to commencement of construction. Strict compliance with all environmental conditions and commitments resulting from regulatory approvals, and implementation of VDOT's specifications and standard best management practices will protect the environment during construction.

The NEPA document and the results of other environmental studies are available at today's meeting. Representatives from VDOT's Environmental Section are available to discuss this information and to answer questions.
