VDOT in partnership with the Northern Neck Planning District Commission is looking at ways to improve the efficiency of the Route 3 corridor from Route 301 in King George County to the Norris Bridge in Lancaster County.

The first phase of the study shows the existing conditions; seeks public feedback on how the existing corridor operates; identifies problem areas; and gathers input on how to improve the corridor.

Attend the meeting nearest you to be part of the solution.

Meet with representatives from VDOT and the Northern Neck Planning District and provide comments that will be included in the final report. Your input will be used to develop the final recommendations to improve this busy transportation corridor.

A presentation will be made at 5:30 p.m. at both locations.
