The purpose of the study is to help localities and VDOT to identify strategies to preserve capacity, enhance safety and support future growth along the Route 220 corridor between the North Carolina state line and Route 419 in Roanoke. Preliminary design concepts to enhance mainline traffic flow and improve safety include restricting median crossovers and minor intersection turning movements and improving traffic signal operations along the corridor.

Citizens will be able to speak with study team representatives. The meetings will be held in an "open house" format with a formal presentation given approximately 30 minutes after the start of each meeting. The same information will be presented at each meeting for the entire Route 220 corridor. For questions about the meetings, contact VDOT at 540-494-8288 or 1-800-367-7623, TTY/TDD 711.
