**Find out** about proposed plans to repair the Gholson Bridge over the Meherrin River, located on Iron Bridge Road (Route 715). The primary purpose of this project is to rehabilitate the aging structure on its existing alignment. The bridge was built in 1884 and is not currently equipped to handle future traffic volumes. Minor pavement improvements will be necessary. A height and width detection system is also proposed on each bridge approach to reduce oversized vehicle impacts to the historic structure.

The meeting will be held in an open forum style from 5 - 7 p.m. This format will provide the flexibility to allow participants to meet and discuss the proposed project directly with project staff members.
