## **DRIVE CAREFULLY NEAR WARRENTON SOUTHERN INTERCHANGE PROJECT**

*Motorists should expect daily lane closures in both directions on Route 15/17/29*

CULPEPER — VDOT reminds motorists to pay attention to signs and other traffic controls when approaching the Warrenton Southern Interchange project near Route 880 (Lord Fairfax Drive) in Fauquier County.

Construction activities requiring daily lane closures on Route 15/17/29 in both directions will continue for the next several months along with daily flagging operations on Route 880. The lane closures will be implemented during off-peak travel times.

Until the project is complete by Nov. 25, drivers should be alert for workers near the travel lanes and construction vehicles entering and exiting the work zone.

### **Project Information**

Under a \$19.6 million contract, design-build contractor Shirley Contracting Company, LLC of Lorton, with design services from Dewberry of Fairfax, has worked since February 2018 to design and construct the grade-separated interchange utilizing two roundabouts connecting all points of travel.

More information about the project, including roundabout driving tips, can be found on VDOT's website at [www.virginiadot.org/projects/culpeper/warrentoninterchange.asp](http://www.virginiadot.org/projects/culpeper/warrentoninterchange.asp).
