Route 301 Bridge Replacement Over CSX

Emporia

Cost: \$4.8 Million

Current Status: Construction began April 2015. Completion estimated July 2017.

About the Project: This project will replace the bridge carrying the southbound lanes of Sussex Drive (Route 301) over the CSX railroad tracks approximately 3 miles north of the Emporia city line. The southbound Route 301 Bridge over the CSX tracks will be demolished, removed and rebuilt. Construction crews will coordinate with the railroad to make sure trains are not impacted. Traffic in the southbound direction will be detoured to I-95 during the project.

I-95 Meherrin River Bridge Replacement

Emporia

Cost: \$22.2 Million

Current Status: Construction began March 2016. Completion estimated October 2019.

About the Project: The Meherrin River bridges on I-95 north and south will be replaced to correct functionally obsolete shoulder widths. Crews will first build a new southbound bridge next to the existing southbound bridge. Once complete, southbound traffic will be shifted to the new bridge and northbound traffic will be shifted to the old southbound bridge. Crews will then demolish the old northbound bridge and build a new bridge in its place. Once that is complete, northbound traffic will be shifted onto the new span and the old southbound bridge will be demolished. Traffic will not be affected along I-95 for the majority of the project.
