IMPROVEMENTS**

VDOT PROJECT 0606-088-653, C501 & 0606-088-622, C501, B634

January 19, 2016

- 1) The CE NEPA (dated 12/1/15) document indicates that a Phase II subsurface investigation is currently being performed on the Shell and former Texaco gas station. Has the study been completed and will you make it available before the RFQ submission date?

VDOT Response: The Phase II subsurface investigation report is still under development and VDOT anticipates including it in the RFP Information Package.
