Written Notice
Of
Emergency Contract

Over a period of time and during routine yearly inspection, it was determined that the existing corrugated metal culvert has deteriorated severely and would need to be replaced immediately. This warranted the District Structure and Bridge Section to address this situation immediately and start the process to execute an Emergency Force Account Contract.

The Portsmouth Road Culvert Replacement emergency repair work includes the following scope:

The scope of this project is to completely demolish/remove the existing corrugated metal culvert with a reinforced concrete triple-box culvert on Portsmouth Road (VA Route 1529) over Tributary of Bull Run, located in Prince William County, Virginia. The replacement culvert will be 30 feet wide and 73 feet long. A portion of the road surface will be removed and later replaced to allow for the removal of the existing culvert and the installation of the new box-culvert. The existing roadway will be milled and overlaid at either side of the culvert replacement. The roadway, Portsmouth Road within the vicinity of the project location will be completed closed to traffic during construction.

Route: 1529
Project No.: 1529-076-099
Location: Portsmouth Road over Tributary to Bull Run
County: Prince William County
Contractor: General Excavation, Inc.

Date Awarded: July 2, 2014
