Written Notice
Of
Emergency Contract

Over a period of time and during routine yearly inspection, it was determined that the existing corrugated metal culvert has undermined and created an unsafe / hazardous condition for the travelling motorists along Route 699 Dry Mill Road over Dry Mill Branch and would need to be replaced immediately. This warranted the District Infrastructure Section to address this situation immediately and start the process to execute an Emergency Force Account Contract.

The Dry Mill Road Culvert Replacement emergency repair work includes the following scope:

- Completely replace the existing corrugated metal culvert with two (2) 60” class III reinforced concrete pipe; headwall with wing walls and endwalls; guardrail; existing fence; trees as needed and roadway section, located in Loudoun County, Virginia. During construction a pump around will be in place to maintain positive drainage. The roadway, Dry Mill Road within the vicinity of the project location will be completed closed to traffic during construction.

Route: 0699
Project No.: 0699-053-099
Location: Dry Mill Road
County: Loudoun County
Contractor: General Excavation Inv. (GEI)

Date Awarded: June 13, 2014

District Maintenance Engineer
