Emergency Force Account

On November 21, 2014, the southernmost exterior girder of the Franconia Road Bridge was damaged when struck by a dump truck. The impact was in the third lane from the left going northbound on I-95. The exterior girder is significantly out-of-plane and the concrete is spalled at the bearing support indicating that the anchor bolts were pulled. In addition, the diaphragm connection plates are fractured and disconnected and the utility support connections are fractured and disconnected from the exterior girder. This warranted the District Structure and Bridge Section to address this situation immediately and execute an Emergency Force Account Contract.

The Franconia Road Bridge emergency repair work includes the following scope:
Girder straightening and miscellaneous painting on the damaged girder of the Franconia Road Bridge over I95 in Springfield, Virginia.

Route: 644
Project No.: 0644-029-111, N501; Structure # 25851
Location: Franconia Road Bridge over I-95
County: Fairfax County
Contractor: Martins Construction Corp
Date Awarded: December 5, 2014

District Maintenance Engineer
