

## OutsideVDOT Business Partner Extranet

---

As a business partner of the Virginia Department of Transportation, you are invited to join the VDOT Air Quality team site on OutsideVDOT. This is the internet site where data is stored to support emissions and dispersion modeling.

OutsideVDOT is an extranet that allows VDOT and its authorized business partners to share information. It is structured as a collection of websites that support the agency's various collaboration needs. VDOT staff and the employees of its business partners are granted access to the sites that help them perform their jobs with greater ease and efficiency.

To access the OutsideVDOT Air Quality data site you will need to register and obtain credentials, please complete the [ITD-35E](#) (external user information section) and [ITD-36E](#) (VDOT information security agreement) forms for all individuals who will need access and send them back to me, your VDOT Point of Contact. The forms can be scanned and emailed, or sent by mail to my attention. Each user will receive a follow-up communication with his/her username and instructions on logging in for the first time.

Once you are setup with credentials you will be able to access the site at <http://outsidevdot.cov.virginia.gov>. After logging in you will see the main OutsideVDOT webpage, from this page click on the VDOT Air Program site link.

Please contact me if you have any questions about accessing the site.

Thanks
