

# ProjectWise – Gmail Link

ProjectWise is able to copy links to Gmail by right clicking on the file and clicking 'Copy Documents Link to Clipboard'.

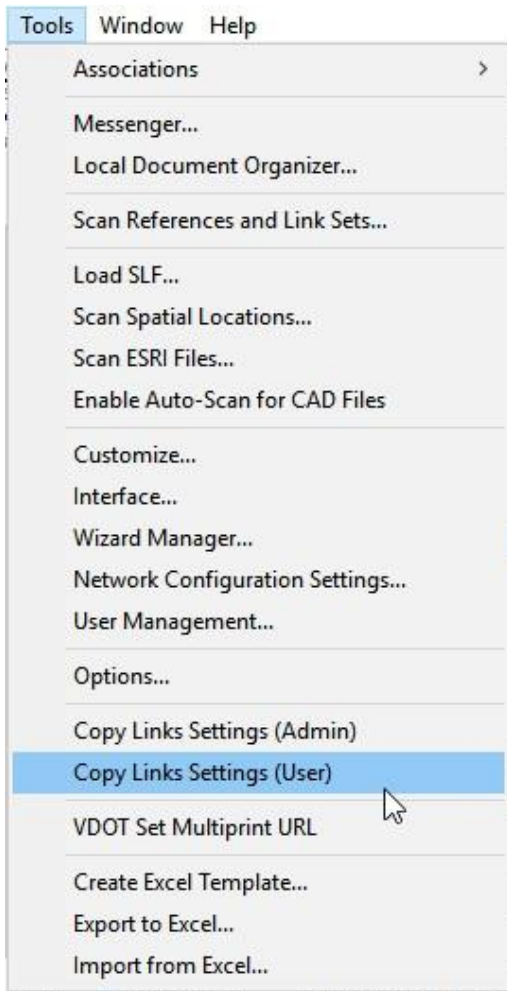

If you do not have this then please let CADD Support know so that we can have this updated on your computer.

Your computer will need to be on the network either by VPN or in the office – the update cannot be deployed to your computer via ZScaler.

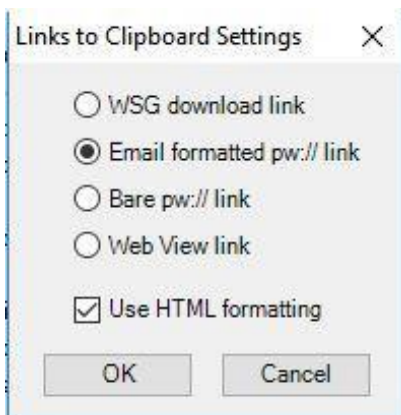

Once the update has been deployed to your computer you will need to configure the update by doing the below.

- Open ProjectWise Explorer
- Click Tools
- Scroll down and choose 'Copy Link Settings (User)'

# ProjectWise – Gmail Link

- Choose the email formatted pw:// link as shown below

- Click OK

Those changes are now saved and you will be able to send ProjectWise links via email to users.
